

LIMITED WARRANTY

Campagnolo S.r.l., Vicenza, Italy, warrants that new Campagnolo bicycle products (except tools and lubricants) will be free from defects in materials and workmanship for twelve (12) months from the date of their original purchase.

Campagnolo will either repair or replace, at its discretion, any product found to be defective.

This warranty does not cover: normal wear, improper assembly or use in conjunction with non-compatible products, improper servicing or maintenance, alteration or modification, misuse, abuse, neglect, commercial or competitive use, accident, or damage in shipment.

Campagnolo shall not be responsible for any special, indirect, incidental or consequential damages, whether or not foreseeable. Any implied warranties, including warranties of merchantability and fitness for a particular purpose, shall be limited in duration to the time period set forth above. Some states do not allow the exclusion or limitation of incidental or consequential damages or limitation on how long an implied warranty lasts, so the above limitations or exclusions may not apply to you. No one is authorized to modify or extend the terms of this warranty. There are no warranties which extend beyond the description on the face hereof.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

Warranty claims can be submitted through the product's point of purchase, parts supplier or directly through Campagnolo S.R.L., Vicenza, Italy.

The return of warranted parts for inspection must be authorized in advance in writing by Campagnolo.

A dated proof of purchase is required.

All Shipping charges to and from Campagnolo are a responsibility of the claimant.

Any claim outside of the terms of this warranty, or which does not follow these procedures, will be rejected.

We recommend that you review the complete warranty text (of which this is a condensed version), which is included in each product's packaging or can be requested through your dealer, supplier or from Campagnolo S.R.L. at the addresses below.

Campagnolo®

1995

This is the group used by the top professionals who exploit and push the qualities of all its components to extreme limits.

The Record Group is the very best that cycling enthusiasts can get.

Every single component of this group has all the 'muscle' that goes into all our new projects, a symbol of the enterprise with which Campagnolo has launched itself towards the 21st century.

This is apparent throughout the range: the crankset with its new, more streamlined design; the much lighter, flush-fitting bottom bracket and the new front derailleurs which, combined with the Exa-Drive chain-rings, permits shifting even when the chain is under maximum stress.

Close attention has also been paid to the design and aesthetics of the components as can be seen with the new ERGOPOWER control integrated with the BB-SYSTEM. Record is synonymous with performance, functionality, reliability and beauty, all indispensable features for a group which reasserts its leadership among racing-bike components.

Record. Today's group for cycling in the future.

BOTTOM BRACKET: The development of a new generation of low-profile cranks has led to the creation of a Record cartridge-type bottom bracket with a shorter axle. This not only considerably reduces the weight, it also makes the axle more rigid so that it will not flex under stress, thus transmitting all the rider's force on the pedals. Made of special heat-treated steel, the axle turns on three ball-bearings (two on the right side, which is the side under the greatest stress) protected by a hermetic seal. Another barrier against dirt is provided by two removable bushes which are fitted with vulcanized lip seals.

EXA-DRIVE SPROCKETS: The already highly successful EXA-DRIVE sprockets symbolize all our commitment to research into producing the most innovative and perfectly reliable transmission. The sprocket range has been augmented to satisfy the most disparate needs, from professional racing to cycle touring. Made of special steel with a nickel-chrome finish, they have been designed with a new tooth profile which, together with the 'phasing' of the sprockets, permits shifting even when the chain is under maximum tension.

ERGPOWER: The use of carbon fibre for the gear levers allows the weight to be reduced to a level previously unimaginable with traditional materials. Front and rear derailer operation has been made even smoother with the introduction of the "BB-SYSTEM", in which the joints of the various levers turn on ball-bearings, ensuring great shifting precision and sensitivity. Both aluminium brake levers have been further lightened and have Campagnolo's renowned polished, anodized finish. Great care has been taken with the ergonomics of the brake lever hoods, through enhanced design and the use of silicon rubber.
